

BLITZCLEAN UCL

Blitzclean UCL is a concentrated neutral liquid detergent designed for manual cleaning operations in the hotels and institutional industries. It is in fact, a safe general purpose detergent for any task.

FEATURES

- An amber liquid product
- Readily mixable with both hot and cold water
- Chemically stable
- Quickly penetrate contaminants - emulsify and disperse residues
- Drains and rinses completely - surfaces clean and free of film streaks and water spots
- Most suitable for use in hard water areas
- Will not harm painted and waxed surfaces
- Completely biodegradable
- Safe on hands

USAGE

For normal cleaning operations:

Blitzclean should be use at a concentration of 100 mls per litre of water

For hand cleaning operations:

A temperature of 40°C is recommended, although this may be elevated at 60°C where soak applications are employed
