

ISORITE® ... your partner in cleanroom and micro-contamination technologies

ISORITE® TYVEK CLEANROOM PAPER

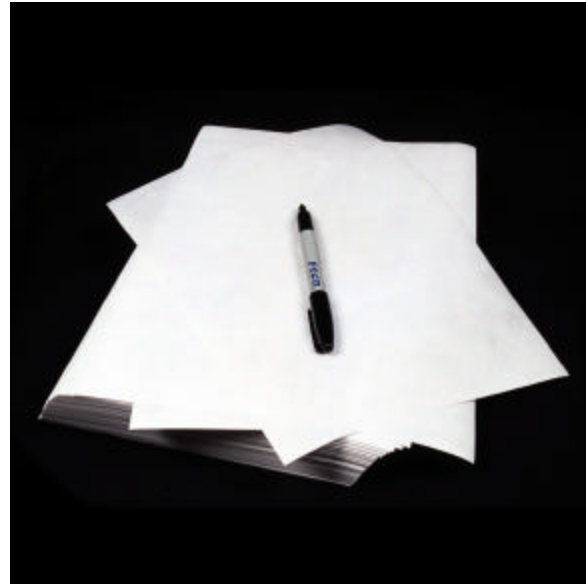

The Isorite® range of Tyvek cleanroom stationery products combines some of the best properties of fabrics, films and papers, with a basis weight of 54 g/m². The toughness and puncture-resistance of Tyvek is outstanding compared to other materials in the same price and weight range. Its combination of tensile strength, elongation, tear strength and flex life is unique.

Tyvek is moisture insensitive and naturally water- and rot-resistant. It is inert to both organic and inorganic chemicals, and will not generate free lint particles under conditions of ordinary use.

However, it is not recommended for use with photocopier machines due to its low melting point.

The Isorite® range of Tyvek cleanroom stationery products are processed and assembled in our Class 10 cleanroom and double wrapped to ensure protection against contamination. Your logo or any information you require may be printed on the cover, top sheet or inside pages. Customized forms printing is also available.

Also available is the Tyvek Wafer Separator, a circular white piece of paper specially designed for use as wafer separator, chip tray divider, and PC board wrap. It is available in diameter sizes of 4", 5", 6", or 8".

Part Number	Size	Packaging	Carton Packaging	Quantity
<i>Tyvek Paper Sheets</i>				
ISR/ST-TVKPPA1	A1	250 pcs/pkt	10 pkt/ctn	-
ISR/ST-TVKPPA4	A4	250 pcs/pkt	10 pkt/ctn	133
ISR/ST-TVKPPA5	A5	250 pcs/pkt	20 pkt/ctn	-
ISR/ST-TVKPPA6	A6	250 pcs/pkt	40 pkt/ctn	88
ISR/ST-TV26X22.5	26" x 22.5"	<i>Sold in pcs.</i>		-
ISR/ST-TV2X2	2" x 2"	250 pcs/pkt		
ISR/ST-TV4X4	4" x 4"	250 pcs/pkt		
ISR/ST-TYVEKROLL	36" x 3000 yards	1 roll/ctn	1 Roll
